

# THE GREEN BOOK

**Produce Market Information Directory**  
Distributed by the National Association of Produce Market Managers

# **Preface**

Wholesale produce markets continue to play an important role in the distribution of fresh fruits and vegetables. They perform essential tasks in an ever-changing industry by offering various handling, processing, and marketing functions designed to improve efficiency in the distribution of fresh produce. Key functions performed by wholesale produce markets include the breakdown and consolidation of produce shipments; packaging, repackaging, and other value-added processing; and providing outlets for the direct and wholesale marketing of local farmers' products.

The Green Book is a comprehensive directory of mostly wholesale produce markets operating in the United States, Canada, and Australia. It provides each market's location, operating hours, management structure, accessibility, and the layout of its facilities. Site maps provide roadway access information and the location of buildings and parking areas. Also included are tenant listings, gate fees, and inspection services offered at the markets. Features that are specific to each market, including restaurants, motels, banks, and vehicle repair services, provide users with relevant information when traveling to these markets.

The Green Book is produced by the National Association of Produce Market Managers (NAPMM) in cooperation with the United States Department of Agriculture (USDA), Agricultural Marketing Service (AMS). The NAPMM represents produce market managers, State and local marketing officials, and other individuals involved in managing, operating, and owning wholesale produce markets.

Research for this project was conducted under a cooperative agreement with the NAPMM, Don Coker, President, and administered by the USDA-AMS, Transportation and Marketing Programs, Marketing Services Branch (MSB), Errol Bragg, Program Manager.

## **This directory was prepared by:**

Greg Grajewski, Civil Engineer, Project Leader for USDA

Fidel Delgado, AIA, Architect

Lee Elders, Agricultural Economist - Intern

## SPECIAL FEATURES

Market opened in 1976 and operates as an integral component of the Maryland Food Center complex. The produce market consists of two buildings with approximately 330,000 square feet of space subdivided into 101 individual units. Approximately 18,470 tractor-trailers and 140 railcars of produce entered the market in 2000-June 2001. Facilities in or near the market include truck stops for servicing, fuel, and truck washing as well as truck scales, a motel, a bank, a convenience store/gas station, and a fast food restaurant. The produce dealers own and operate highly specialized companies and lease their offices, storage, and dock facilities from the Maryland Food Center Authority. Receiving/shipping terminals and handling, storage, refrigeration, and processing functions for produce are centralized into a single location. Depending on the growing season, produce arrives daily from growers in the United States and around the world.

## SPECIAL FEATURES

Market opened circa 1860 and was long noted as the world's largest cash-to-grower wholesale produce market. The market is placed upon 27 acres of asphalt and boasts 205 semitruck loading docks and 14 commercial coolers. It operates primarily as a seasonal market selling and shipping numerous farm products grown from the southwestern region of Michigan's famous fruit belt. Approximately \$200 million worth of farm products are sold annually. The market experiences 38,000 trucks annually. Parking/sleeping and pallet exchange are permitted. Restaurants are located on the market, and nearby facilities include a motel, a gas station, a bank, and an ATM. The market is home to over 750 farm families who are registered to sell their farm products direct and through the market's many brokers.

Market opened in 1975. It covers an area of 100 acres. In addition to produce, growers, and flower markets, the Sydney Markets also operates the famous Paddy's Markets, The Sydney Fresh Food Market, and the Swap and Sell Market. There is a plaza shopping centre on site including a hotel/motel, eateries, and banks. The annual throughput of the market is A\$1.6 billion, comprising A\$900 million in fresh produce, A\$100 million in fresh cut flowers, and A\$600 million in retail sales and warehouse activity. Sydney Markets handles approximately one-third of Australia's horticultural produce.
